Reporting on the Environment

WABASSO ISLAND, FL – On March 17, 2010, from 4:00 to 5:30 PM, at the Indian River Shores Community Center, Dinah Voyles Pulver reports on the preservation of wildlife and conservation lands, water quality and the St. Johns River, as well as weather, hurricane science and natural disasters. Her presentation is part of the lecture series given by noted environmentalists, and sponsored by the Environmental Learning Center.

Dinah Voyles Pulver is a sixth-generation Floridian who has covered a wide range of environmental issues for more than a dozen years at the Daytona Beach News-Journal. Subjects of her recent articles include our recent cold weather, climate change, El Nino's impact on our weather, off-shore drilling for oil, the kite surfer killed by a shark attack, the earthquake in Haiti, and right whale sightings along the Florida coast. Mrs. Pulver's talk, based on her broad experience and insight on environmental events and issues, promises to be both interesting and informative.

Admission for the event is \$15 per adult. Reservations may be made by calling the ELC at (772) 589-5050 or emailing info@DiscoverELC.org. The Indian River Shores Community Center is located at 6001 North A-1-A, north of Beachland Blvd in Vero Beach.

The Environmental Learning Center is located north of Vero Beach off County road 510 at the end of the Wabasso Bridge. Its 64-acre campus includes exhibit areas, native plant gardens,

picnic facilities, gift shop, and visitor center. A list of its many field excursions, including hikes, boat excursions, nature walks, and bird watching can be found at www.DiscoverELC.org.
